

# DOCTOR OR VET

By Dena Fritz

With all that happens at our place

The question I often face

Is do I ask the doctor or the vet?

What do I do with my ringworm that hasn't cleared yet

Can I cure Pa's liver flukes with Ivomec

A pair a fence'in pliers just went thru my lip

Do I need a tetnus shot or can I just iodine it

For these do I ask a doc or a vet

How long can I be around gopher poison before I feel the effect

Will a shot of lutalyse cause me to reproductive wreck

Speak'in of shots, what signs will I see

If I've had just small ones of Blackleg, 8 way & BVD

Should I be call'in the doc or the vet

When work'in with grain treat, how soon do I need to wash the pink

What happens if I ingest tattoo ink

I heard that Micropaste can cure the flu

And that ACE can calm yer nerves, are either of 'em true

Who would know, the doctor or the vet

What size suture scars the least

How do I treat a brand that got me, not the beast

And when AI'in & my britches is my gun shelf

Can I accidentally artificially inseminate myself
